

Water Utility Council

The **Water Utility Council** includes member committees focused on government affairs and utility management.

- **Government Affairs Committee:** keeps members informed of water industry laws and regulations, participates in AWWA's Annual Fly-In and EPA Region 1 activities, and provides updates through webinars and articles.
- **Utility Management Committee:** shares best practices to build public trust, distributes information on rates and finances, and handles public relations issues.

Technical and Education Council

The **Technical and Education Council** addresses matters pertinent to the areas of expertise represented by our members. We are currently seeking individuals with experience in the following fields:

- **Water Quality:** advancing strategies to protect public health and the environment.
- **Infrastructure:** gathering and disseminating information on infrastructure initiatives.
- **Sustainable Water Management:** promoting approaches to safeguard environmental resources.

Council subcommittees will contribute to the development of programs and articles supporting each of these domains.

Committee Descriptions **March 2026**

Member Services Council

The **Member Services Council** oversees subcommittees focused on member engagement, communications, and support for students and young professionals.

- **Member Engagement Committee:** welcomes new members, manages onboarding, and helps select Section Awards.
- **Section Communications Committee:** supports Water Wayfinder and other publications as needed.
- **Young Professionals and Student Committee:** connects with student chapters, runs scholarships, and organizes networking events.

Events Council

The **Events Council** plans the annual conference, including the technical program, keynote speaker coordination, and support in securing sponsors and exhibitors. The council also oversees section competitions such as the Water Taste Test and Hydrant Hysteria.
